Friday Classes

Crafts

of seats 16

Tuition: \$60

Class Description: We will create monthly craft projects that are simple and fun for kids of all ages. The teacher will introduce students to basic art terminology. Each meeting will consist of the teacher walking the students through how to use the technique to create their own piece to take home.

S.T.E.A.M.

of seats 16

Tuition: \$60

Supply Fee: \$15

Class Description: Students will explore hands-on activities incorporating all elements of STEAM to provide an unforgettable learning experience. Introducing & reinforcing science vocabulary, this class will also help teach students early problem-solving skills in a hands-on application.

Farm Biology

of seats 16

Tuition: FREE to Members

Class Description: This class focuses on hands-on activities that explore the biology of the farm. We will learn what makes a farm function from the microorganisms in the compost pile to the large cows strolling around the pasture. This class utilizes our local Music

Music

of seats 16

Tuition: \$60

Class Description: We will meet monthly to sing, dance, and play musical instruments. Each meeting will feature a new song, a new musical instrument, and time to play on Orff instruments. Music ignites all areas of child development and will help the students to develop rhythm, tone, and motor skills.

Lego Club

of seats 16

Tuition: \$50

Supply Fee: \$15

Class Description: Lego Club will allow students' creativity to flow. They will build transportation vehicles, seasonal items, and anything else that their minds can imagine. Elements of S.T.E.A.M. will be implemented in each class as challenges are presented. Students will alternate working in groups and as an individual to solve building challenges in exciting hands-on learning opportunities.

Coding

of Seats 5

Tuition: \$50

Supply Fee: \$15

Class Description: This course will introduce students to the basics of computer programming in a fun and interactive way using the visual programming language Scratch. Fundamental concepts of computer programming - such as variables, loops, and branches - will be demonstrated through engaging projects that include animations and simple games.

Sewing

Session I: 9-10am

Session II: 10-11am

Session III: 11am-12pm

of seats: 12 (3 per session)

Tuition: \$120 per semester

Supply Fee: \$15.00

Class Description: If there's one homesteading skill that everyone should know, regardless of gender or age, it's sewing. Whether it's sewing on a quick button or repairing a small tear in a pair of pants, sewing is an invaluable skill. Join Mrs. Ruth Slade-Sargent, twice a month, to hone your threading, stitching, and mending skills. Learn from Mrs. Ruth's years of experience and love for this art of craftsmanship. This is a beginner level sewing course, that will start with the basics of sewing and step up in level as the semester progresses. Early classes will have small class inclusive projects, but will progress to a multi-class project that will span multiple class sessions. Students will learn sewing machine basics as well. Come join this laid back, fun experience, and leave with an invaluable skill.

Spanish

Time: 12:30-1:30pm

of seats: 5

Tuition: \$240 per semester (16 class meetings)

Class Description: Buenos-Dias! The best time to learn a foreign language is in youth. We are excited to be able to bring a foreign language class to The Country Schoolhouse with Mr. Adolfo Pardo. A native of Peru, Adolfo has spent time living in both South America and Europe, before moving to America with his family. He has taught his native language of Spanish in many different settings. This beginner level Spanish course will teach students the Spanish alphabet sounds and words by utilizing song, with Mr. Adolfo on the piano, as well as with games and recitation. Students will be introduced to the basics of the Spanish language of numbers, colors, and simple phrases.
